What (Who) Is Tay?

- Microsoft's AI machine-learning Twitter bot
- Intended to speak like millennials, learning from twitter interactions
- Bio: "Microsoft's A.I. fam from the internet that's got zero chill!" (If you don't understand any of that, don't worry about it.)

How Does It Work?

- Microsoft is **secretive** about it because it's being redeveloped
- Most likely trained with **neural networks**
- Mined, modeled, filtered public data

Oops?

What Could Go Wrong?

What Went Wrong?

- Microsoft didn't blacklist certain words
 - Will repeat after you if you tell it to
 - Learned how to say bad things on its own
- Tay doesn't know who Hitler is, or what is a feminist. She just sees 'noun, verb, adjective.'

Takeaway

- Like humans, AI requires good teachers

Thank you!
